Promoto New Model Advice

OGGY KNOBBS NOW AVAILABLE TO SUIT THE YAMAHA MT-10 2016-2017

Oggy Knobbs are now available for the Yamaha MT-10. Promoto's Oggy Knobbs take the brunt of impacts and road surface abrasion and can significantly reduce repair costs after a fall.

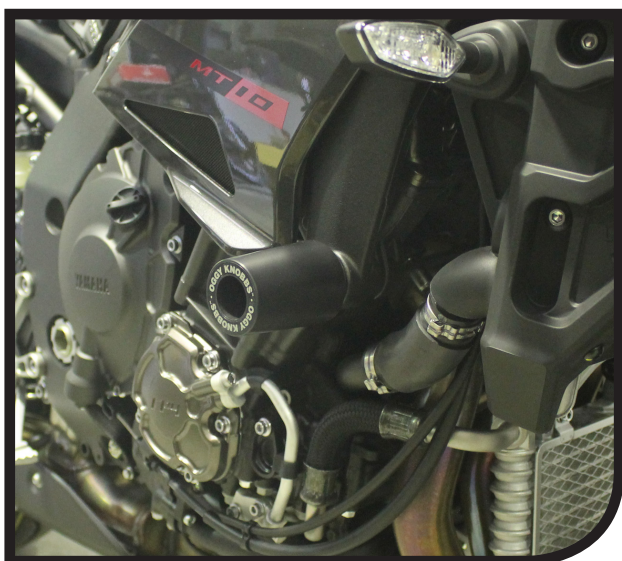

Only the strongest, most resilient materials are used to ensure strength, performance and appearance. State of the art manufacturing techniques like CNC machining, laser cutting and MIG welding are used in the production process for accuracy and perfect fit.

The aluminum compression components are made from aircraft grade 7075 T6511, the bolts are de-embrittled, high tensile items, zinc plated and clear chromates, the "plastic" used in the sliders is Acetal for the best combination of shock absorption, abrasion resistance and strength.

All metallic components are fully finished for corrosion resistance and durability as well as a pleasing appearance. If you do have to use them and need to replace parts, spares are readily available.

The knobbs are available in either black or white and are a fraction of the average bike repair bill.

Front axle oggys and pick ups are also available.

Black, no cut	Part # OK898	RRP \$195.00
White, no cut	Part # OK899	RRP \$195.00
Front Axle	Part # AAF063	RRP \$ 99.00
Pick Up Protector # PUP06		RRP \$ 44.95
Race Stand Pick Up #SPU06		RRP \$ 29.95

These new Oggy Knobbs are now available from your favourite motorcycle dealer anywhere in Australia.
