
Press Release 25/06/2008

Scorpio Moto Security have new model motorcycle alarm systems available in Australia now.

SR-i900 Main Control Module and Transceiver handset shown.

The range topping SR-i900 features RFID technology which allows the “Main Control Module” to sense the proximity of the handset automatically arming and disarming the system, no need to faff about in pockets looking for your remote just turn the ignition key and ride.

All Scorpio alarms are vibration damped and hermetically sealed to meet OEM requirements so you know it's a quality product built to last.

Compatible with Scorpios plug and play factory fit wiring harnesses for a simple no tools installation.

The SR-i900 has too many features to list here, from perimeter sensor included as standard to vehicle battery level display, see our web site www.kenma.com.au or you can even phone us on 02 9484 0777 for more information

The SR-i900 is available from all good motorcycle dealers for \$540.00 RRP and for only \$50.00 extra can be optioned up with a Remote Ignition Disable unit if your motorcycle doesn't have its own ignition disable system.
