## Press Release – 5<sup>th</sup> March 2004

---

### Oh my, it's ENORMOUS! Introducing Avon's 300 section AM42 Venom-R radials.

AM42 Venom-R 300/35 HR18 and 300/40 HR17 radials. If rear tyre size matters to you, these are the dog's knackers. So bold, in fact, that they will make J-Lo green with envy. Made to go as well as to show, these tyres feature the renowned AM42 Venom compound and tread pattern, radial construction, and aramid belts for added stability.

These tyres feature, for the first time on a motorcycle tyre, Avon's rim protection system. Usually seen only on top shelf car tyres, this system helps prevent (expensive) rim damage from our third-world quality roads. The radial construction of these capable, mean, phaaaaat, ultra low profile rear tyres allows them to be matched with either a radial, bias belt, or cross-ply front tyre. They are very well complimented by the new, fat AM41 120/70 H21 and 120/70 R19 Venom front tyres.

These monster rear tyres suit 10.00 – 11.00 inch wide rims and will give your custom bike the most memorable of rear ends.

### Pricing

AM42 300/35 HR18	RRP \$469 incl. GST
AM42 300/40 HR17	RRP \$469 incl. GST
AM41 120/70 R19	RRP \$204 incl. GST
AM41 120/70 H21	RRP \$198 incl. GST

### Availability

AM42 300/35 HR18 – late April 2004
