## Press Release – 17<sup>th</sup> February 2004

---

### Introducing new Seat Bags from Ventura.

**Ventura** has released two new lightweight bags for your motorcycle. These bags do not need any fancy ironwork, bracketry or racks – they simply attach to your standard seat. Great for sports bikes for carrying small amounts of luggage in a convenient and easy to use design that will not detract from the look of your bike.

The design features a soft panel that attaches to the seat, located by straps underneath. The seat bag itself simply clicks to the panel by way of heavy duty, quick release clips. Because the seat bags use only the seat for mounting, there should be no threat to your paint work.

Ventura seat bags come in two handy sizes: 10 litre (shown) for sports bikes with limited pillion seating, and 14 litre for larger seated bikes. The bags and seat pads are made from super tough Kodra material and feature the same levels of quality, workmanship and features that we expect from a company like Ventura.

Ventura Seat Bags are priced at \$85.00 (10 litre) and \$90.00 (14 litre) RRP.
